

Three patients from the long-term care ward of Wasatch County Hospital and 27 from Carewest-Heber Nursing Center were treated to a ride on the Heber Creeper recently. Many reminisced about the days when they regularly traveled by train. It was not an easy task getting everyone ready for the trip then loading them, some in wheelchairs and others with walkers, onto the train. Young railroad employees capably and lovingly assisted and the engineer patiently held the train in the station after it was due to depart until everyone was safely settled aboard. Melba Kinsey, who arranged the outing, reported the nursing staffs began getting patients ready for the outing at 5 a.m. But the patients apparently had such a good time that everyone's hard work and cooperation was worthwhile.
